Guided by the principle that all children deserve the opportunity to live a full life, the Flamboyán Foundation works to ensure that every child in the United States and in Puerto Rico receives an excellent education. In Washington D.C., Flamboyán accelerates student learning while helping educators and the school system transform their relationships with students’ families. In Puerto Rico, Flamboyán focuses on promoting students to read at their level when they finish third grade, while building a prosperous nonprofit and philanthropic sector.

LITERACY IN GRADES K-3 (2011-2015)

Key Findings

• 85% of K-3 students live below the poverty level.
• 25% of K-3 students are chronically absent (10% of teaching time).
• 22% of first grade students earn D or F grades in the Spanish class. 12% are retained.
• 40% of third grade students do not reach proficiency levels on standardized Spanish tests.
• Students living below the poverty level and those who are chronically absent show much lower achievement levels than their counterparts.
### Interruptions during the last years

#### 2017-18
**Hurricane Maria**

The reopening of schools began on October 23. By December 4, it was estimated that 97% of the schools offered classes.

According to the Youth Development Institute, these were the averages of days that students did not attend school as a result of the passage of Hurricane Maria:
- Children up to 5 years: 92 days
- Children and young people between 5-17 years: 78 days

#### 2018-19
**Schools closings**

According to the Center for Puerto Rican Studies, 265 public schools closed:
- 66% (175) of the closed schools were elementary schools.
- Decrease in operating schools: From 1,515 in 2006 to 855 in 2018.
- In the rural area, 65% were closed, while in the urban area, 35%.

#### 2019-20
**Earthquakes**

Due to the earthquake on January 7, classes did not resume until the evaluation of the schools was completed:
- School began in stages from January 28 to March 6.
- In February, 55 schools in the most affected municipalities were reorganized into tents, wagons, and public and private buildings.

**COVID-19**

Since March 15 the schools ceased their work according to the government's total closure order as a preventive measure.

Various distance education options were offered through the DE page. Academic work will cease on May 8.
We know that students experience learning loss during the summer:
- Students have been documented to lose 1-3 months of academic progress during the summer months, especially in reading and math
- Low-income students are the most affected in reading, widening the gaps between them and their higher-income counterparts.

Although we do not have data available in Puerto Rico, other jurisdictions have made projections of the alarming loss of learning that interruption to face-to-face classes can mean:
- Washington DC projects a loss of up to 16% in reading scores on standardized tests if you cannot return to schools this semester
PRIORITY FOR K-3 EDUCATION

- Provide continuity of educational opportunities throughout the next academic year (i.e. summer, extended hours, tutoring, academic year extension), including by alternative means to the Internet (TV, radio, etc.)
- Conduct reading assessments when schools reopen to identify the individual needs of all students
- Prioritize core curriculum areas and fundamental reading skills
- Provide comprehensive professional development for teachers so that they can offer distance learning, manage the social-emotional needs of their students, and focus instruction on fundamental reading skills and the individualized needs of students
- Ensure the health of students and their families, especially including food security
One of the most pressing social needs during the pandemic is to **ensure that students have access to food** while schools are closed.

The Families First Coronavirus Response Act, signed on March 18, provides significant flexibilities so that school districts can prepare and distribute meals to students during the pandemic, funded by federal funds.

Different jurisdictions have taken advantage of these flexibilities and have generally followed **one of the following options to provide food:**

1. "Grab and go"
2. Delivery
3. Public-private partnerships
4. Pandemic EBT:
   - Under the Families First Coronavirus Response Act, state agencies may decide to distribute funds instead of food to families who qualify for free or reduced-price lunch. Funds go directly to EBT cards, including those used for nutritional assistance (SNAP, PAN). Six states have received approval for this program. In Michigan, families will receive at least $180 per month, per student, for each month that the school is closed.
Given the high level of concentration in Puerto Rico, public schools offer breakfast and lunch to all K-12 students every day (almost 300,000).

School canteens have been closed since the curfew began. PRDE has decided not to prepare meals, in part because of health concerns for canteen workers. To date, PRDE has addressed nutritional needs through three food donations to nonprofit organizations:

<table>
<thead>
<tr>
<th>Donation date</th>
<th>Pounds of food</th>
<th>Rations</th>
<th>Number of days equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>March 30</td>
<td>110,000</td>
<td>889,000</td>
<td>1.5 days</td>
</tr>
<tr>
<td>April 3-7</td>
<td>264,000</td>
<td>3,224,000</td>
<td>5.5 days</td>
</tr>
<tr>
<td>Next</td>
<td>179,000</td>
<td>1,432,000</td>
<td>2.5 days</td>
</tr>
</tbody>
</table>

Current Limitations:

- Donations hold nonprofits, not the government, accountable for ensuring that food reaches students.
- Donations to date cover less than 10 days of food, and schools have been closed since March 16.
- Food is being distributed to all members of the community.
- Lack of communication with families on how to receive food.
- Examples of organizations that are not equipped or prepared for food distribution, and examples of organizations that received expired food.
Elected officials and organizations have called for PRDE to reopen the lunchrooms to distribute food to students, including the People's Social Task Force, made up of a group of 100+ nonprofits.
Recommendations to ensure food reaches students:

- **Immediately**: Follow-up and accountability to ensure that the food donated so far reaches the students.

- **Soon**: Explore and search for an alternative that provides access to food for all students. There are many local organizations that are ready to help with the preparation and distribution of meals, including measures to protect the health and safety of all.

- **In the longer term**: Look for the opportunity for Puerto Rico to participate in Pandemic-EBT, including for future emergencies and interruptions to the school year. This option could provide the greatest flexibility for direct food assistance to families.
