

AWR-312-W: Climate Change for Tribal Nations

Tribal Nations Readiness and Resilience Training

Course Description (Course Coming Soon)

This asynchronous web-based training offers participants a comprehensive introduction to the complexities of extreme weather within the context of emergency management, with a specific emphasis on its implications for Tribal Nations. Through a series of modules, participants will delve into the root causes of the changing climate and explore its direct impacts on Tribal communities. Furthermore, the course will examine strategies for integrating changing climate considerations into Tribal Nations' preparedness initiatives, equipping participants with essential knowledge and tools to navigate this pressing issue effectively. Participants will engage in interactive discussions and activities that underscore the importance of collaborative approaches, fostering a community of learning and action that equips Tribal Nations to implement robust and culturally sensitive strategies.

Course Learning Goal

By the end of this training, learners will be able to identify how climate science can support climate change adaptation within Tribal Nations.
